MUHAMMAD AWAIS RAZA

+92 326 2050209 | awaisrazaansari1111@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

BS Artificial Intelligence student at UET Lahore focused on applied machine learning and data science. Hands-on with Python, NumPy, Pandas, scikit-learn, and Matplotlib, with a growing portfolio of shipped ML projects, API-integrated AI apps, and a public build-in-public track record.

EDUCATION

University of Engineering and Technology (UET), Lahore | *BS Artificial Intelligence* 2025 – 2029

2 Semesters CGPA: 3.733 / 4.00

Relevant coursework: Programming for AI, Data Structures & Algorithms, Object-Oriented Programming, Linear Algebra, Calculus

PROJECTS

Machine Failure Prediction System (PumpSensor) | *Python, Streamlit, Machine Learning* | View repo / Live Demo

Why it matters: predicts machine failures from pump sensor time-series data so issues can be flagged before breakdowns occur.

- Developed Phase 1 of an ML system that predicts machine failures from pump sensor time-series data, with an interactive Streamlit frontend for user input and predictions.
- Structured as a three-phase build; Phase 2 and Phase 3 are in progress to extend and complete the model.
- Open-source under the MIT license on GitHub with continuous commits.

Student Performance Analytics | *Python, Pandas, NumPy* | View repo

Why it matters: turns raw student records into actionable insight, from clean data to personalized recommendations.

- Built a Python data pipeline (Pandas + NumPy) that cleans student records, computes performance metrics, and ranks students.
- Implemented academic-risk flagging and personalized recommendations, with CSV and JSON report generation.

Student Score Prediction | *Python, scikit-learn, Linear Regression* | View repo

Why it matters: a clean, end-to-end introduction to supervised learning on a real prediction problem.

- Built a machine learning model with Linear Regression to predict student final scores, using Python, Pandas, NumPy, and scikit-learn.

Additional Projects

- **Qt-based AI Chatbot** (C++, Qt, Groq API): desktop chatbot with secure login/signup, real-time chat, voice input, image/file uploads, and persistent chat history. View repo
- **Finance & Expense Manager** (Python): modular console budget tracker with PBKDF2-HMAC-SHA256 password hashing, category budgets with overspend warnings, and monthly reports. View repo

EXPERIENCE

Independent AI App Developer | *Self-Directed / Build in Public* 2025 – Present

- Designed and shipped AI applications, including a dual-model (Claude + Grok) Android chat assistant with end-to-end API integration.
- Built practical data and ML skills in Python, NumPy, Pandas, scikit-learn, and Matplotlib through applied projects, alongside C, C++, OOP, and DSA.
- Documented the build-in-public process across GitHub and LinkedIn, maintaining a personal portfolio site.

Technical Writer | *Technical Writing (HU-221), UET Lahore*

- Authored a technical report, "AI in Software Development: Comparison with Traditional Manual Development."

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript (basics), HTML, CSS

Data Science & ML: NumPy, Pandas, scikit-learn, Matplotlib, Linear Regression, data cleaning & analysis

Frameworks & Libraries: Streamlit, Qt, Android Studio, Ionic/Capacitor

AI / APIs: Anthropic Claude API, xAI Grok API, Groq API

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

Tools & Platforms: Git, GitHub, GitHub Pages
